3 MEMES FOR SATB CHORUS AND PIANO

*by Emily Hope*

FOR PERFORMERS USE ONLY

# 1. SPIDERS GEORG

*by Max Lavergne (reallyreallyreallytrying on tumblr)*

“average person eats 3 spiders a year” factoid actually just statistical error. average person eats 0 spiders per year. Spiders Georg, who lives in cave & eats over 10,000 each day, is an outlier and should not have been counted

# 2. HOT PLUM

*by James (utopians on tumblr)*

stepped on a plum (overripe plum) (barefoot) it was on the driveway got out of the car and accidentally (didn't know it was there) stepped on the plum (warm) (on the ground) (it had fallen from the tree) barefoot (no shoes) wearing long pants (too long) (need to hem them) plum viscera got on them (the pants) unexpected plum on the driveway (hot plum) (97 degrees out) already super hungover (throwing up all morning) (should not have been driving at all) and I stepped out of the car (black car) (97 degrees out) and onto the plum (unexpected) (didn't know the plum was there) and it burst (plum nightmare on my only good pair of sweatpants) still we find ways to keep ourselves going from day to day

# 3. I THINK THAT'S BEUTIFUL

*by Jack (nerdgul on tumblr)*

Your average pineapple, peeled and cut makes about 4.5 cups or 36 ounces of pineapple chunks. Cans of pineapple come in a variety of sizes the most common being 20oz and 46oz. Meaning a single pineapple generally won't fill up a single can perfectly, which also means everytime u eat pineapple from a can somewhere someone else has the can that has the rest of that same pineapple. Meaning u can share a single fruit with a stranger from hundreds of miles away and I think that's beautiful
